## SUMMARY

Senior software engineer with deep experience in cloud infrastructure, distributed systems, and large scale product delivery. Built resilient services and developer platforms for enterprise environments.

## EXPERIENCE

### Senior Software Engineer | Acme Cloud

2021 - Present

- Led modernization of deployment orchestration platform to improve reliability and release velocity across multiple teams.
- Implemented robust service-level objectives and observability dashboards that reduced mean time to recovery in production incidents.
- Partnered with product and design stakeholders to deliver roadmap-critical capabilities while maintaining strict quality standards.

### Software Engineer | FinServe

2018 - 2021

- Developed backend APIs and asynchronous processing pipelines for high-volume financial workloads and reporting tools.
- Improved query performance and data modeling strategies for operational data stores supporting analytics and reporting.

## PROJECTS

### Developer Platform Revamp

Internal Platform

- Created reusable service templates and continuous integration standards to improve consistency across teams.
- Drove adoption with documentation, migration guides, and direct enablement sessions for engineering groups.

## SKILLS

- TypeScript
  - Node.js
  - React
  - PostgreSQL
  - Redis
  - Docker
  - Kubernetes
  - Terraform
  - CI/CD pipelines
- Observability and incident response

## EDUCATION

- B.S. Computer Science, Example University

## CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
